

Special Issue

Community-Based Health Care

Message from the Guest Editors

The Special Issue *Community-Based Health Care* is devoted to recent findings on “Community-Based Health Care as a Response to Social and Environmental Determinants of Health Inequities” to make substantial contributions to knowledge gaps in understanding when and how individual health care services and health system reforms are effective in addressing health inequalities related to living conditions and environmental exposures.

A wide range of topics will be included in this issue, related to, but not limited to implementation and evaluation of community based health care interventions, their impacts on social and environmental determinants of health inequalities, measurement of program adoption, fidelity and outcomes, characteristics of individuals, health conditions, and community contexts associated with relative intervention impacts, the roles of provider and patient advocacy, and provider and participant knowledge, attitude and behavior change associated with community based health care services interventions that improve health outcomes for historically devalued or excluded groups.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
