

Special Issue

Psychosocial Burden in Individuals at Risk of Criminal Behaviors

Message from the Guest Editors

This Special Issue aims at providing a versatile collection of studies using various constructs, data sources, and analytical approaches to broaden the current knowledge on theoretical (e.g., etiological models, predictive associations) and practical implications (e.g., treatment, prevention, and policy) in the context of psychosocial burden and criminal behaviors. This collection of studies may inspire research, treatment, and policy approaches that support individuals at risk of criminal behaviors to develop toward a healthy, non-delinquent future, and thus protect society from further crime.

Guest Editors

Prof. Dr. Wolfgang Retz

Dr. Marcel Aebi

Dr. Steffen Barra

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
