

Special Issue

The Phenomenon of Toxin-Producing Cyanobacterial Blooms and Their Impact on Aquatic Organisms, Ecosystems, and Human Health

Message from the Guest Editors

In particular, this Special Issue welcomes papers on:

- environmental (climatic, hydrological etc.) conditions for the formation of cyanobacterial blooms in fresh-, brackish-, and marine waters;
- monitoring of toxic cyanobacterial blooms, metabolites, and metabolites' transformation products in aquatic environments;
- factors influencing the bioaccumulation, biotransformation, and decomposition of cyanobacterial metabolites;
- structural characterization of new cyanobacterial metabolites;
- biology, ecology, and monitoring of aquatic organisms living in ecosystems affected by cyanobacterial blooms;
- the influence of cyanotoxins and other cyanobacterial metabolites on aquatic organisms, ecosystems and human health: risk assessment;
- the development of monitoring systems of cyanobacterial metabolites in waters and assessment of aquatic toxicity: scaling techniques, dynamic models, biological indicators;
- role of modeling and remote sensing measurements as tools in HCBs management.

Both original research papers and review papers are welcomed.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
