

## Special Issue

# Public Health Surveillance and Intervention for Abuse of Older Adults

### Message from the Guest Editor

This Special Issue aims to contribute to the global health agenda by serving as a multidisciplinary forum for compiling and disseminating robust evidence on two fundamental pillars of the public health response to older adults abuse: surveillance and intervention. We particularly welcome studies from LMICs that document the magnitude, risk factors, and diverse manifestations of abuse across settings, as well as research that evaluates prevention strategies, early detection programs, and care models adapted to resource-limited contexts. Contributions from high-income countries are also encouraged, especially those offering comparative insights or lessons applicable across different health system realities.

### Guest Editor

Dr. Liliana Giraldo-Rodríguez

Centro de Investigación en Políticas, Población y Salud, Facultad de Medicina, Universidad Nacional Autónoma de México, Mexico City 04510, Mexico

### Deadline for manuscript submissions

1 March 2027

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
