

## Special Issue

# Climate Change and Medical Responses

### Message from the Guest Editors

The last three years have tragically shown how our societies are vulnerable regarding health, the environment, and the economy. Climate and energy crises, pollution, pandemics, and migrations call for comprehensive and effective complexity management. Climate has been defined as a major health threat, and health needs to be included in the effective climate change strategies so far. In addition to the health effects of climate change (CC) assessed through the number of deaths, emergency visits and hospitalisations, there are many other diseases linked to climate change, which are not quantified because they are treated by family doctors (FDs) and family paediatricians (FPs). Last but not least, one of the most critical lessons from the COVID-19 pandemic is the crucial role that Medical Response could play on the occasion of global/local emergencies such as those due to CC in diagnosis or screening and triage, as well as in the short and long-term monitoring of the physical and psychological conditions of those affected.

### Guest Editors

Dr. Paolo Lauriola

Prof. Dr. Margherita Ferrante

Dr. Gea Oliveri Conti

Dr. Domenico Vito

### Deadline for manuscript submissions

30 September 2025

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
