

## Special Issue

# Dental Hygiene and Oral Health Research: Lessons and Challenges

### Message from the Guest Editors

Oral health is an important indicator of general health, well-being and quality of life. Poor oral health impacts on people's ability to eat, speak, socialise and work. Good oral hygiene is necessary to maintain a health mouth and strong teeth for lifetime. Adequate oral health knowledge and oral health literacy are essential to instill appropriate oral health behaviours to prevent oral and dental diseases. Oral health literacy is a strong predictor of an individuals' oral health, health behaviors and oral health outcomes. Meanwhile, oral health literacy has, at its heart, the social determinants of health, being directly linked with upstream factors including social inequalities and inequities regarding access to dental services. This special issue focuses on oral health, oral hygiene, oral health related knowledge and literacy, risk factors and oral health impact assessment. We will accept manuscripts for both qualitative and quantitative research. New research papers, systematic or critical review papers, commentaries and conference papers are welcome to this issue.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
