

Special Issue

Dermatologic Therapy Research and Public Health

Message from the Guest Editors

For this Special Issue, we invite researchers to submit high-quality original papers or systematic reviews focusing on the practical aspects of the management of autoinflammatory and autoimmune dermatological diseases. Skin diseases are chronic, affecting many aspects of a patient's life, resulting in a significant reduction in the quality of life and even depression. New therapeutic options are sought, because standard treatment often does not meet the expectations of the doctor and the patient. Here, we present new therapeutic treatment options. This Special Issue focuses on new therapeutic options for treatment and other possibilities of well-known medications.

Guest Editors

Prof. Dr. Agnieszka Owczarczyk-Saczonek

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
