

Special Issue

Dietary Polyphenols and Health

Message from the Guest Editors

The *International Journal of Environmental Research and Public Health* is preparing a Special Issue focusing on the effects of dietary polyphenols on health.

Polyphenols are plant compounds that possess bioactivity in the body, including in supporting oxidative defense. This Special Issue aims to compile current research on the health benefits of dietary polyphenols. This is an active area of research involving multiple disciplines and we seek to present varied perspectives that provide up-to-date evidence linking polyphenols to health outcomes. Invited manuscripts include original research articles, food-based and supplement investigations, longitudinal and cross-sectional studies, intervention and epidemiological research, meta-analyses, and reviews.

Guest Editors

Dr. Marva Irene Sweeney-Nixon

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
