Special Issue

Digitalization as a Driving Force for Occupational Safety

Message from the Guest Editor

Digitalization offers a range of new options for innovative developments in today's working environment. The changes that come with the advances in digital technologies are particularly evident in the industrial sector. Artificial intelligence, advanced robotics, big data, interconnectivity, real-time communication, virtual and augmented reality, remote monitoring and remote process control are defining for the new era called Industry 4.0. The rapidness of these developments and the changes that they bring about for the work of employees present new challenges for occupational safety and health.

This Special Issue focuses on new technologies in the field of occupational safety and health. Topics of interest include—but are not limited to

assistant systems in machinery virtual reality in risk assessment augmented reality in process monitoring artificial intelligence in occupational safety and health collaborative robotics smart PPE human factors

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
