

Special Issue

Disaster Mental Health Risk Reduction

Message from the Guest Editors

The global increase in extreme climatic events and disasters, whether natural or human-induced, will have significant impacts on the mental health and wellbeing of affected populations. Despite a growing recognition of the importance of mental health and psychosocial support aspects in global disaster policy frameworks (such as the Sendai Framework, and the WHO Framework for Health Emergency and Disaster Risk Management), the intersections of our current approaches to disaster risk reduction and existing efforts to address mental health and psychosocial aspects in disaster and emergency contexts are still relatively poorly understood. This Special Issue will therefore provide a unique opportunity to further examine these insufficiently explored themes and intersections through a disaster risk reduction lens across the various stages of the disaster life cycle and across geographies.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
