

## Special Issue

# Addressing the Growing Burden of Chronic Diseases and Multimorbidity: Characterization and Interventions

### Message from the Guest Editors

Although considerable research effort has been conducted during the past two decades to describe the epidemiology and impact on the health of multimorbidity, there are still some gaps that remain to be filled. The increasing availability of electronic health records for research purposes represents an opportunity to conduct large-scale population-based studies on chronic diseases and multimorbidity. However, the use of large databases also presents some challenges for researchers and clinicians concerning data curation and management, study design and statistical analyses, which have rapidly evolved from traditional statistical techniques to artificial intelligence and machine learning algorithms. In this Special Issue, we are looking for both observational and intervention studies on the multimorbidity and comorbidity of major chronic diseases. Reviews on this topic and methodological papers on the use of real-world data for the study of multimorbidity are also welcome.

### Guest Editors

Dr. Maria João Forjaz

Dr. Antonio Gimeno-Miguel

Prof. Dr. Julián Librero López

### Deadline for manuscript submissions

closed (28 February 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
