

Special Issue

Influence of Domestic Violence on Mental Health

Message from the Guest Editors

We are extending this Special Issue call for papers on an important pervasive social problem that impacts the health and well-being of individuals. Years of research have indicated that domestic violence, including acts of physical, psychological/emotional, sexual, and child abuse (ACE) can profoundly affect the mental health of its victims. Yet, the scientific literature is still limited on: (1) the underlying factors that might exacerbate the intersection between domestic violence and mental health (i.e., substance use, anxiety disorders, suicide); (2) whether certain populations (i.e., marginalized, vulnerable, underrepresented) might exhibit unique mental health outcomes; and (3) how social and contextual factors (i.e., neighborhood characteristics, migratory factors, disaster/hazard-prone settings, discrimination) mitigate the relationship between domestic violence and mental health. We, therefore, call for papers that examine the relationship between domestic violence on mental health to further understanding and inform the development of intervention strategies. We especially welcome unpublished research that addresses underrepresented populations within the global context.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
