

## Special Issue

# Community Drug Checking to Reduce Harms

### Message from the Guest Editors

This special issue will publish research and policy and practice commentaries generated from community drug checking services across the world and provide a 'go to place' for those wishing to develop their own services or to share learning. A key advantage of this special edition is that it will help fill an identified knowledge gap in relation to models of community drug checking and questions surrounding implementation, operation, impact and practice-based theory. As guest editors we are keen to hear from anyone that would like to make a contribution so please get in touch.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
