

Special Issue

EMF Exposure Assessment in 5G and 6G Emerging Scenarios in Humans and Environment

Message from the Guest Editors

This Special Issue focuses on innovative approaches for EMF exposure evaluations, filling the research gaps and obtaining reliable and realistic evaluation of the exposure levels for the general population and in everyday environments. Research papers or reviews can focus on (but are not limited to) innovative measurement techniques and protocols, computational methods, stochastic and deterministic dosimetry approaches, machine learning and integrated strategies, approaches for minimizing exposure, networks optimizations, etc.

Guest Editors

Dr. Emma Chiaramello

Dr. Bonato Marta

Dr. Sam Aerts

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
