

Special Issue

Environmental Pollution: Cause, Health Effect and Control

Message from the Guest Editor

The Special Issue “Environmental Pollution: Cause, Health effect and Control” focuses on the emerging chemical and biological pollutants in water, air, soil, food and feed and their associated health effects as well as the innovative strategies for the management of these environmental pollutions. We are pleased to invite you to contribute a manuscript to this Special Issue in the International Journal of Environmental Research and Public Health (IJERPH). Contributors are welcome to submit reviews and original research articles, including but not limited to the following topics:

- Emerging and conventional pollutants in the environment including water, air, soil, food and feed
- Health effects of chemical and biological pollution on humans and animals
- Risks assessment of chemical and biological pollution on the environment and ecosystem
- Innovative approaches for environmental pollution degradation
- Emerging approaches for environmental sterilization.

We are looking forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
