

## Special Issue

# The 2nd Edition of Urban Environmental Quality

### Message from the Guest Editors

The urban environment has long been associated with community health risks. However, quantifying environmental exposure to measure urban environmental quality is always a challenge, since environmental components of the complex system across the urban environment are interacting with each other. Moreover, failure to quantify the environmental quality can result in a problematic estimation of environmental health risks. Therefore, this Special Issue will focus on the following topics: 1) Improvement of exposure assessments for measuring urban environmental quality; 2) Linking indoor and outdoor environmental exposures by modeling; 3) Novel design to spatially or spatiotemporally estimate urban environmental quality; 4) Application of community health assessment with improved data for urban environmental quality.

### Guest Editors

Prof. Dr. Charles Man Sing Wong

Department of Land Surveying and Geo-Informatics, The Hong Kong Polytechnic University, Hong Kong 999077, China

Dr. Rui Zhu

Senseable City Laboratory, Future Urban Mobility IRG, Singapore-MIT Alliance for Research and Technology (SMART), Singapore

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
