The Effects of Eating Habits on Human Health

Message from the Guest Editor

Proper eating habits help you stay healthy long term. Moreover, they have a beneficial effect on mood and well-being. On the other hand, bad eating habits have a negative impact on physical and mental health. They contribute to the development of many diseases, including cardiovascular diseases and cancer, but also depression, skin diseases, and gastrointestinal diseases. In this Special Issue, research articles and reviews on the impact of eating habits on human health are welcomed.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
