The Continuing Relevance of Vulnerability and Resilience Study: Advances in Disaster Management

Message from the Guest Editor

Management of disaster events has sometimes been weak, if not dangerously lacking in certain cases, putting the public at risk. There have also been positive cases, from which we may learn and apply understanding elsewhere.

This call for submissions seeks to encourage manuscripts addressing considerations of disaster management, rigorous papers involving quantitative, qualitative, or mixed-method approaches are invited. Efforts to bridge gaps between academic pursuits and official policy and practice, to effect positive change, are particularly welcome.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
