

Special Issue

Mental Health of Employees: Shame, Self-Compassion, Work Engagement, and Work Motivation in the Globalized World

Message from the Guest Editor

this issue considers relevant mental health constructs including but not limited to shame, self-compassion, work engagement and work motivation. Studies that inform feasible, practical, and “real-life” solutions for challenging work mental health are especially welcomed, narrowing the gap between research and practice. Lastly, in order to offer helpful insights to today’s internationalized workplaces, research that evaluates the mental health across different cultures/contexts is recommended. This again follows an emphasis on narrowing the research-practice gap, increasingly identified in the occupational research. We hope to receive your meaningful and impactful study manuscripts.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
