

## Special Issue

# The Environment and Children's Health

### Message from the Guest Editors

The environments where children live, play, and learn have key roles in their behaviour, well-being, and development. Both physical and social environments have been found to influence many childhood health outcomes, such as physical activity, diet, mental well-being, cognitive performance, and sleep. The physical environment includes built or natural features, while the social environment includes elements such as social cohesion and residential segregation. Children's environmental exposures occur at various geographic scales (i.e., from micro to macro), such as homes, schools, streets, parks, neighborhoods, and regions. Understanding how the various environments that children are exposed to affect their health and well-being has gained considerable attention in public health research. Accordingly, the aim of this Special Issue is to highlight the broad scope of novel and contemporary research focused on the environment and children's health. More information on this issue can be found at: [https://www.mdpi.com/journal/ijerph/special\\_issues/Environ\\_Children\\_Health](https://www.mdpi.com/journal/ijerph/special_issues/Environ_Children_Health)

### Guest Editors

Prof. Dr. Jason Gilliland

Human Environments Analysis Laboratory, Department of Geography, Western University, London, ON N6A 3K7, Canada

Dr. Gina Martin

Human Environments Analysis Laboratory, Department of Geography, Western University, 1151 Richmond St, London, ON N6A 3K7, Canada

### Deadline for manuscript submissions

closed (30 November 2020)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
