

Special Issue

Environmental Health Literacy and Equity

Message from the Guest Editors

This Special Issue will be devoted to environmental health literacy inquiries. We call for papers focused on Issues such as inhibiting access to information or establishing barriers to engagement, as well as papers exploring efficacious actions. Environmental health issues including those related to the climate crisis, natural and anthropogenic disasters, air and water quality, workplace exposures, and increased industrialization require more widespread awareness. Scientists, researchers, and health practitioners are being challenged to re-examine their own assumptions, expectations, and communication skills. The “translation” of scientific findings into public discourse can support local, national, and international advocacy and policy responses. Environmental justice is another approach that envisions fair access, involvement, and treatment for all with respect to environmental laws, policies, and regulations (<https://www.epa.gov/environmentaljustice>).

Guest Editors

Dr. Rima E. Rudd

Dr. Cynthia Baur

Ms. Kathryn Tomsho

Dr. Vanessa Simonds

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
