Special Issue

Environmental Pollution and Associated Human Health Effects

Message from the Guest Editor

In recent years, the rapid development of the global economy and the accelerating process of urbanization not only cause great pressure on the ecological environment but also pose a serious threat to human health and safety. Various emerging pollutants emerge one after another, bringing severe potential harm to humankind and representing a research hotspot and difficulty in the field of environmental health. Although scientists from various countries have a certain scientific understanding of the fate, source, migration, and transformation of such substances and the harm they cause to the human body, research on their pollution characteristics and ecotoxicology, human exposure and health risks, and ecotoxic effects and pathogenesis is still in its infancy. As such, we are proposing this Special Issue on environmental pollution and human health. Papers on all topics linked to environmental pollution and human health are encouraged in this Special Issue. Manuscripts on new findings regarding environmental problems or novelty environmental techniques are also welcomed.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
