

Special Issue

The Impact of Built, Natural, Social, and Virtual Environments on Human Health

Message from the Guest Editors

Our environments (built, natural, social, and virtual) are conceivably the most significant and influential aspect of human health and well-being. Environments impact every facet of our lives, from where we are born, live, work, and play to how these built, natural, social, and virtual spaces affect our actions and behaviors, physical and mental health, quality of life, and overall life expectancy.

This Special Issue of International Journal of Environmental Research and Public Health (IJERPH) focuses on the connections between built, natural, social and/or virtual environments, and human health. New research papers, reviews, case reports, conference papers, methodological papers, position papers, brief reports, and commentaries are welcome to this issue. We will accept manuscripts from a variety of disciplines.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
