

## Special Issue

# Evidence-Based Physiotherapy Practice in Public Healthcare

### Message from the Guest Editors

This Special Issue will focus on evidence-based physiotherapy practice and its role and relevance in public healthcare. Incorporating research results into clinical practice assumes that a strategic approach must be adopted by anyone working in healthcare seeking to achieve acceptable levels of effectiveness. Evidence-based physiotherapy practice (EBPP) integrates clinical expertise, patient values and the best available research evidence concerning decision making for patient care. However, as the amount of physiotherapy research has increased dramatically in recent decades, this has made it difficult for many physiotherapists to keep up with advances in research and put findings into practice.

Several countries' health authorities have promoted making evidence-based practice (EBP) the standard approach for providing health services, but efforts must continue to be made regarding the implementation and use of available tools for EBPP to reduce uncertainty concerning taking clinical decisions affecting physiotherapy.

We welcome high-quality papers focused on the use of evidence including a critical review of studies and the scientific literature in clinical practice.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
