

Special Issue

Mental Health and Wellbeing Promotion for (Im)migrant People

Message from the Guest Editor

This Special Issue explores innovative research and practice in promoting mental health and wellbeing among (im)migrant populations, including refugees, asylum seekers, and undocumented individuals. As global migration patterns intensify due to sociopolitical unrest, climate change, and economic disparity, the psychological impact of displacement, acculturation stress, and systemic exclusion is becoming increasingly urgent. This Issue seeks to highlight multidisciplinary approaches that center lived experiences, cultural strengths, and community-led interventions. Special attention is given to intersectional challenges (e.g., race, gender, age, legal status) and the need for ethical, responsive, and contextually grounded solutions. This Issue aims to deepen understanding, inform public health and social policy, and amplify practices that honor the dignity and humanity of (im)migrant people worldwide.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
