

## Special Issue

# The Role of Home Visitors during the Healthy Development of Children

### Message from the Guest Editor

This Special Issue will focus on how home visiting can foster positive child development. It will explore how consistent home-visiting interventions from prenatal through the preschool years can positively influence the cognitive, physical, and socioemotional development of children. Potential topics include how home visitor characteristics impact the success of programs, how engagement variables affect program efficacy, how demographic variables relate to overall program effectiveness, or how any other variables enable home-visiting programs to effect positive changes in child development. Discussion of the role of diversity, equity, inclusion, and belonging in how positive changes occur is encouraged.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
