

## Special Issue

# Future and Feature Paper in Environment and Applied Ecology

### Message from the Guest Editors

This Special Issue will publish thematic series of high-quality articles on key topics in Environment and Applied Ecology from developed and developing countries. Research and studies on databases, modeling approaches, and technologies applied to ecology and environment are the starting point for a more sustainable future. Human health must be always considered together and in close connection with legislative frameworks. The boundaries between environment issues and applied ecology must be not only overpassed but thought of as starting point for an interdisciplinary approach. In order to attract excellent scholars and promote our Section “Environment and Applied Ecology”, we will offer discounts and encourage submission of high-quality papers to this Special Issue. In this framework, studies concerning the related topics, in the form of both interdisciplinary and specialized manuscripts.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
