

Special Issue

Feature Papers in Health Communication

Message from the Guest Editor

This Special Issue will publish a thematic series of high-quality articles on key topics in health communication. Effective communication is essential to successful practice at every level of the health system. All stakeholders are involved: public and private institutions, healthcare professionals, industries, associations, and, above all, citizens. The spread of new information technologies, the adoption of health quality measurements and value-based rewards, as well as the requests of the patient community to promote shared decision-making offer new opportunities. If your paper is well prepared and approved for further publication by the academic editors, you will benefit from a publication discount.

Guest Editor

Dr. Alessandra Solari

Unit of Neuroepidemiology, Fondazione IRCCS Istituto Neurologico Carlo Besta, Via Celoria 11, 20133 Milan, Italy

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA
