

## Special Issue

# Feature Papers in Women's Health

### Message from the Guest Editors

This Special Issue will publish a series of high-quality articles on key topics in Women's Health. The papers will be directed towards health professionals, women's health experts, public health workers, social scientists, policy makers, and others concerned with issues related to the health and care delivery to women. While welcoming papers on all aspects of women's health, we aim to include papers on epidemiology, including the social determinants of health, and prevention. This Special Issue aims to discuss new knowledge or new cutting-edge developments in women's health research as well as evaluations of programs that work and innovative ideas in the field. We will welcome papers that address issues of women's health in achieving the Sustainable Development Goals and in addressing climate change. Papers could be either research papers with a detailed summary of their own work done so far or papers highlighting the state-of-the-art developments in one of the areas of Women's Health.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
