

Special Issue

First Nations' Health and Wellbeing Promotion: Within and beyond Health Systems

Message from the Guest Editors

First Nations people represent the oldest, continuous knowledge systems on the planet and are increasingly being looked to for deeper insights into human and environmental sustainability because of their understanding of collective wellbeing and the interrelationships between all living things. At the same time, however, First Nations people are experiencing worsening health inequities as the processes of colonisation and corporatisation detach people from their homelands and cultural practices. First Nations people have shown tenacity and resilience in continuing to assert their sovereign rights and strive for changes in health systems, services and research in the face of ongoing loss and social injustice.

This Special Issue seeks to gather the most up-to-date approaches to promoting health and wellbeing amongst First Nations people with a focus on strength and capability and the importance of culturally appropriate and community-driven processes. New research papers, methodology papers and reviews are welcome in this issue. First Nations authors are strongly encouraged to submit.

Guest Editors

Dr. Tamara Mackean
Dr. Matthew Fisher
Dr. Julieann Coombes

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
