

Special Issue

Shale Gas and Fracking: Impacts on Health and the Environment

Message from the Guest Editors

We welcome papers on any aspect of the broad general themes of the issue and from a range of disciplines—physical sciences, medicine, social sciences and engineering—including papers across disciplines. Submissions might, for example, address debates around hazard identification, risk, risk perception and risk communication, community engagement in planning or opposing shale gas developments, environmental and public health impact assessments and epidemiology, air pollution, water and soil pollution, interventions, and policy and regulation and enforcement. Whilst submissions are welcome from anywhere in the world, we would especially welcome those from low and middle-income countries within Africa, South America, and Asia, as well as contributions from Australia, Russia, and Central and Eastern Europe, where shale gas explorations are planned or currently underway.

Guest Editors

Prof. Dr. Andrew Watterson

Head of the Occupational and Environmental Health Research Group,
Faculty of Health Sciences, University of Stirling, Stirling FK9 4LA,
Scotland, UK

Prof. Dr. Mohamed Aqiel Dalvie

Director, Centre for Environmental and Occupational Health Research,
School of Public Health and Family Medicine, University of Cape Town,
Cape Town 7700, South Africa

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
