

Special Issue

2nd Edition: Occupational & Environmental Health Risk Assessment

Message from the Guest Editors

We are organizing a Special Issue on "Occupational & Environmental Health Risk Assessment" in the journal *IJERPH* (ISSN: 1660-4601, IF: 4.614). A human health risk (HRA) assessment can be defined as the process used to estimate the nature and probability of adverse health effects in humans who may be exposed to hazardous agents at present or in the future. Accordingly, occupational and environmental health risk assessment has generated a number of important scientific discoveries resulting in successful preventive measures. The recent and rapid expansion of occupational and environmental health risk looks set to continue in line with growing public, governmental, and media concern about occupational and environmental health issues, and a scientific need to better understand and explain the effects of occupational and environmental pollutants on human health. New methods and approaches in relation to occupational and environmental health risk assessment have been required. Papers addressing this topic are invited for this Special Issue, especially those combining a high academic standard coupled with a practical focus on providing optimal health risk assessment solutions.

Guest Editors

Dr. Wonho Yang

Prof. Dr. Cheol Min Lee

Dr. Wenwei Che

Prof. Dr. Michael S. Breen

Dr. Yoon-Hyeong Choi

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward
