

Special Issue

Health Inequalities in Primary Care

Message from the Guest Editor

This Special Issue will address issues pertaining to the measurement of health inequalities and the drivers and/or enablers of these inequalities and how they can be addressed sustainably at the primary care level. Upstream issues related to primary healthcare policies, funding, and general resourcing are equally important. We welcome papers that address models for involving the private sector in PHC in order to achieve public health objectives, particularly reducing health inequalities, and multi-sectoral actions addressing the broader social determinants of health and community engagement.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
