

## Special Issue

# Groundwater Contamination in Urbanized Areas

### Message from the Guest Editors

Groundwater is the most abundant freshwater resource available on earth. Groundwater contamination occurs in these urbanized areas due to the illegal discharge of sewage, inappropriate disposal of solid waste, and so on. As a consequence, groundwater quality in these areas becomes worse, and groundwater-related diseases lead to the death of thousands of people every year. This Special Issue focuses on the impacts of anthropogenic factors on the quality of the groundwater environment. We encourage researchers who are interested in this Special Issue to contact us at [Liangping.Li@sdsmt.edu](mailto:Liangping.Li@sdsmt.edu) and [huangguanxing2004@126.com](mailto:huangguanxing2004@126.com).

### Guest Editors

Dr. Liangping Li

Department of Geology and Geological Engineering, South Dakota School of Mines and Technology, Rapid City, SD 57701, USA

Prof. Dr. Guanxing Huang

Institute of Hydrogeology and Environmental Geology, Chinese Academy of Geological Sciences, Shijiazhuang 050061, China

### Deadline for manuscript submissions

closed (31 October 2021)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
