

Special Issue

Cost-of-Illness and Cost-Effectiveness in Disease Management

Message from the Guest Editor

This Special Issue welcomes applied studies to enhance knowledge about the cost-of-illness and cost-effectiveness in disease management using alternative approaches, as well studies focusing on the economic impact of health interventions or shocks (i.e., the COVID-19 pandemic) on disease-related costs over different patient groups and within different contexts. The submission of methodological papers proposing and discussing appropriate approaches to enable and reveal the proper evaluation and analysis of costs of illness and cost effectiveness is also encouraged.

Guest Editor

Dr. Valentina Lorenzoni

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
