

Special Issue

What Women Want: Safety and Personalization of Fertility Preservation Approaches

Message from the Guest Editor

This Special Issue aims to recruit research regarding a personalized approach to fertility preservation. This can range both in the gynecological field (prevention of endometriosis, sexually transmitted infections) and oncological (neoplastic diseases of childbearing age.) In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Endometriosis
- Oncological pathology and fertility
- Techniques of conservative surgery
- Fertility Preservation
- Cervical factor of infertility
- Personalization and Safety in Onco-fertility

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
