

Special Issue

Green Plan and Environmental Policy

Message from the Guest Editor

Scientific and reasonable green planning and environmental policies play a key leading role in the sustainable development of a country and region. This Special Issue is aimed at providing selected contributions on advances in green planning and environmental policy designation:

- Large scale ecological and environmental protection planning and Strategies;
- Territory space ecological collaborative planning;
- Multi scale spatio-temporal prediction and public health planning response of urban heat island and urban wind and COVID-19;
- Theories and methods of urban form optimization and urban green infrastructure;
- Urban Ventilation and urban health;
- Ecological space optimization of urban built environment;
- Multi scale prediction and implementation effect evaluation under multi scenario of carbon peak and carbon neutralization;
- Application of new technologies in urban environmental ecological planning and public health.

Guest Editor

Dr. Weiwu Wang

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
