

## Special Issue

# The Psycho-Social Impact of Human-Animal Interactions

### Message from the Guest Editor

The study of HAI has received an enormous amount of multidisciplinary interest over the past few decades, including research on therapy and service animals. Our relationships with nonhuman animals is now being examined in more depth to understand the physiological and psycho-social benefits of these interactions throughout the lifespan. Additional attention has been given to investigating the role of animals in supporting the lives of vulnerable populations, including the elderly and persons with disabilities. This Special Issue is open to any subject area related to the psycho-social benefits of human-animal interactions. The listed keywords suggest just a few of the many possibilities.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
