

Special Issue

Social, Structural, and Policy Determinants of Maternal and Child Health and Health Inequities

Message from the Guest Editors

The health of women and children reflects the health of a nation. This Special Issue seeks manuscripts that identify social, structural, and/or policy determinants of maternal and child health and health inequities. We welcome the submission of manuscripts that explore how maternal and child health outcomes and inequities are part of and inseparable from the contexts in which they occur. We encourage work that moves beyond documenting associations towards demonstrations of how policy can remediate harmful contexts to advance health equity. We especially welcome interdisciplinary work, mixed methodologies, and research that identifies interventions aiming to dismantle the systems that perpetuate racial, socioeconomic, geographic, and other health inequities in maternal and child health.

Guest Editors

Dr. Maeve Wallace

Dr. Rachel Hardeman

Dr. Whitney Rice

Ms. Brigitte Davis

Dr. Dara Mendez

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
