

## Special Issue

# Social Determinants of HIV Health and Prevention

### Message from the Guest Editors

People living with human immunodeficiency virus (HIV) face numerous social and economic barriers, including poverty, unemployment/underemployment, job insecurity, and a lack of access to vocational services and education. Such barriers decrease their access to and retention in health care systems, resulting in vulnerability to suboptimal treatment adherence, poor clinical health outcomes, and poor quality of life. Negative employment outcomes (e.g., job loss, underemployment) are more prevalent among key populations disproportionately impacted by HIV, including racial/ethnic minorities, transgender, gay, or bisexual individuals, substance users, older adults, and formerly incarcerated individuals; these populations are also disproportionately impacted by labor market discrimination, exclusion, and poverty. For this Special Issue, we invite the submission of papers addressing these topics, especially those combining a high academic standard coupled with a practical focus on providing effective responses to the vocational development and employment needs of PLHIV or research reporting health and prevention outcomes across the HIV continuum of care.

### Guest Editors

Prof. Dr. Liza M. Conyers

Department of Rehabilitation and Human Services, Penn State University, University Park, PA 16801, USA

Dr. KB Boomer

Department of Mathematics, Bucknell University, Lewisburg, PA 17837, USA

### Deadline for manuscript submissions

closed (31 December 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
