

## Special Issue

# Advanced Research in HIV Prevention and Risk Analysis

### Message from the Guest Editors

This special issue of International Journal of Environmental Research and Public Health (IJERPH) focuses on the current state of knowledge in HIV prevention strategies and risk analysis procedures. So; papers addressing these topics and related ones are cordially invited for this Special Issue in order to highlight the most recent advances. Here are some examples of topics that could be addressed in this Special Issue:

- Long-Acting HIV Drugs for treatment and prevention (PrEP).
- Barriers to HIV treatment as prevention (TasP).
- Behavioural; and social preventive interventions.
- Trends in sexuality education.
- Molecular epidemiology to target prevention strategies.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
