# Occupational Therapy in Mental Health: Participation and Meaning in Daily Life

### Message from the Guest Editors

The latest mental health report from the World Health Organization, “World mental health report: Transforming mental health for all” (2022), indicates that more than one billion people have a mental disorder. This figure has worsened in recent years due to the COVID-19 pandemic, with the increase in depression and anxiety in the general population being especially important. However, in the same way that health is not defined solely in terms of the absence of disease, mental health should not be viewed from a reductionist perspective, cataloging it only as the absence of a mental disorder, but as “a state of well-being in which an individual can realize his or her own potential, cope with the normal stresses of life, work productively and make a contribution to the community” (World Health Organization, 2001). Occupational therapy, as a health and social discipline, helps people to build a meaningful life by promoting personal autonomy in their occupations and daily routines, in line with participation within their social and community context.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
