

## Special Issue

# Fourth Edition of Health Emergency and Disaster Risk Management (Health-EDRM)

### Message from the Guest Editors

To promote Health-EDRM research and provide a platform for sharing the latest knowledge in the field, a Special Issue of IJERPH: “Health Emergency and Disaster Risk Management” was set up in 2018, and has published 53 papers in the past three editions. In response to the research needs, a fourth edition of the Special Issue for Health-EDRM is now calling for submissions. The fourth edition invites potential authors to submit papers that aim to examine at all levels the health impacts of any type of disaster, and extreme events of human relevance. Papers that conceptualize the health impacts of simultaneous extreme events (such as Natech), and research investigations that illustrate the applications of study methodologies that capture the interdisciplinary and multidisciplinary nature of health risks would be particularly welcome. Studies targeting COVID-19 and health risk management against secondary disasters are also highly encouraged. Please indicate the relevance of the submitted work to the theme of this edition (Health-ERDM) in the submission.

### Guest Editors

Prof. Dr. Emily Ying Yang Chan

Assistant Dean, JC School of Public Health and Primary Care, Faculty of Medicine, The Chinese University of Hong Kong, Hong Kong, China

Dr. Holly Ching Yu Lam

The Jockey Club School of Public Health and Primary Care, The Chinese University of Hong Kong, Hong Kong, China

### Deadline for manuscript submissions

closed (31 October 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
