

# Special Issue

## Health in EIA/SEA

### Message from the Guest Editor

To operationalize the close collaboration and full inclusion of health into Environmental Impact Assessment, resources and capacities are needed. Case studies, both successful and unsuccessful, guidelines, training courses, and working tools need to be pre-developed and presented if still missing. Research, mostly done in academia, shall connect to practice with the aim to raise the quality of impact assessment to provide as verified as possible prediction of future impacts. Quality assurance tools should also be developed and applied, following the UK and Wales examples. This Special Issue of the Journal of *IJERPH* is seeking high-quality contributions on all areas of inclusion of health into EIA/SEA, on HIA and all the issues mentioned above. We welcome contributions from all around the world, including critical reviews of failed cases of inclusion of health into EIA/SEA. [https://www.mdpi.com/journal/ijerph/special\\_issues/Health\\_EIA\\_SEA](https://www.mdpi.com/journal/ijerph/special_issues/Health_EIA_SEA) We invite contributors from academia, impact assessment practice, policy, and the education arena.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
