

## Special Issue

# Health Economics and Health Governance in the COVID-19 Pandemic

### Message from the Guest Editors

In the era of the COVID-19 pandemic, we have observed that the development of health economics and governance has become a core issue in countries around the world. In this regard, the share of health expenditure in national income is increasing. The financing methods of these expenditures, including health care financing, health insurance, and government deficits, are all research hotspots. This Special Issue focuses on macro- and microeconomics related to the health economy, as well as health economic evaluation, health service research, and health policy analysis. Relevant research topics are the personal and institutional aspects of health care management and the growing importance of health care in developing countries.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
