Special Issue

Health and Energetic Environment

Message from the Guest Editor

We are organizing a Special Issue in the IJERPH on the global interconnectivity between people and Earth's energetic environment and its impact on emotional and cognitive processes, health and behavior. This Special Issue welcomes theoretical and empirical contributions and is open to any subject area related to the solar. geomagnetic, and cosmic environments on health, mental and emotional processes, behavior and interconnectivity. We invite research that explores the relationships between global behaviors and the synchronization of various physiological rhythms with solar and geomagnetic activity. The majority of research conducted thus far has focused on how solar flares and disruptions in the earth's magnetic fields are associated with adverse effects on health and behaviors. However, growing evidence also suggests that some solar and magnetic energy influxes have positive biological and behavioral effects and that the earth's magnetic fields helps to synchronize, energize and nonlocally interconnect living systems. For detailed information on the special issue, please see http://www.mdpi.com/journal/ijerph/special_issues/ Health_EnergeticEnvironment

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
