

Special Issue

2nd Edition of Health Literacy, Nutrition and Public Health

Message from the Guest Editors

It is with great pleasure that we announce a Special Issue of *IJERPH* on Health Literacy, Nutrition and Public Health. In fact, starting from the definition of proximal and distal determinants of health produced by Dalhgren and Withehead in 1991, the strict interconnection between health, nutrition and, more recently, health literacy becomes clear as an individual as well as a diffuse life skill to promote, prevent, and sometimes cure diseases, particularly chronic diseases. Health literacy is declining in many specific disciplines, including food and nutrition. Food and nutrition literacy are becoming potentially powerful arms to strike against obesity, malnutrition, and other nutrition-related diseases, as well as tools (skills) to make people more empowered towards diet and food behaviors and the impact of food on the environment. In this Special Issue, we are expecting that the scientific community can discuss the horizons and the present and future solutions that health literacy—in its components devoted to diet, the environment, food security, food safety, and nutrition-related problems—can offer to improve people's health.

Guest Editors

Dr. Guglielmo Bonaccorsi
Dr. Chiara Lorini
Dr. Virginia Vettori

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
