

## Special Issue

# Health Misinformation on Social Media

### Message from the Guest Editor

We are organizing a Special Issue entitled: "Health Misinformation on Social Media" in the International Journal of Environmental Research and Public Health. Today, the success of the Social Web and the massive use of social media is making an increasingly large number of people rely on information diffused on these media. In fact, in recent years, we have witnessed the explosion of so-called user-generated content (UGC), i.e., content diffused by users on social media without almost any traditional form of control of its quality or veracity by reputable third parties. This can represent a problem especially in the health scenario, in which a large portion of people seeks health-related information. Therefore, the aim of this Special Issue is to address and investigate this problem by assessing perceptions of credibility about health-related information found on social media, under different perspectives.

### Guest Editor

Dr. Marco Viviani

University of Milano-Bicocca, Department of Informatics, Systems, and Communication (DISCo)

### Deadline for manuscript submissions

closed (31 December 2021)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
