Health Risks and Dietary Intake of Emerging Pollutants

Message from the Guest Editors

Food and environment are the most common routes of short, medium and long-term exposure to contaminants that could play a role in the onset and development of diseases, with negative effects on human health. Consumer perceptions of unsafe food tend to focus on acute bacterial or viral outbreaks. However, in the past few decades, chemical contamination has further questioned food safety. The community has a duty to investigate the risks of exposure to emerging contaminants in order to fully understand their role in the onset and incidence of diseases and to ensure public health. The *International Journal of Environmental Research and Public Health (IJERPH)* proposes this Special Issue in order to highlight the latest researches on this field. Researchers from different disciplines are invited to submit scientific articles, systematic reviews and meta-analyses. Multifactorial studies are welcome that can simultaneously evaluate multiple risk factors.

Guest Editors

Dr. Pietro Zuccarello

Dr. Chiara Copat

Dr. Tommaso Filippini

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
