

Special Issue

Cost Effectiveness Analysis of Health Service Intervention

Message from the Guest Editor

The Special Issue seeks novel contributions in cost-effectiveness analyses of health service interventions. We seek studies that expand the knowledge of cost-effectiveness analyses in various aspects, such as data (e.g., record linkage data), stakeholders (e.g., the involvement of end-users), and reporting standards (e.g., a new checklist for cost-effectiveness studies). This Special Issue also encourages other types of studies on cost-effectiveness analyses, including theoretical frameworks and critical reviews of current practices.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
